FOR IMMEDIATE RELEASE

Miami County Sanitary Engineering Automatic Meter Reading (AMR) / Advanced Metering Infrastructure (AMI) Project Phase 1

Miami County, Ohio – The Miami County Sanitary Engineering Department's Automatic Meter Reading (AMR) / Advanced Metering Infrastructure (AMI) Project Phase 1 has commenced as of September 16, 2019.

The AMR/AMI Project Phase 1 involves upgrading the current metering system with a new Advanced Metering Infrastructure (AMI) system. This project allows meters to be read with Automatic Meter Reading (AMR) and eliminates monthly manual reads. The project includes meter upgrades and the addition of Meter Interface Unit (MIU) for current customers in the Phase 1 scope.

The meters and MIU's are being installed by Advanced Utility Services, LLC (AUS), contractors working for Miami County Sanitary Engineering. AUS will contact customers by home visit, phone, e-mail and/or door hanger to schedule an appointment for meter change outs that require access inside a home. Customer may also see AUS working in their neighborhood.

The tentative schedule for upgrades of Miami County Sanitary Engineering Water and Sewer District neighborhoods is as follows:

Monnin Estates
Casstown, Ohio
Brandt / Phoneton / Wiley
Deer Cliff Run
Evanston
Swailles Run
North County Road 25A

For additional information please contact the Miami County Sanitary Engineering Department at 937-440-5653 or visit www.miamicountyohio.gov/AMR_AMI.
