Firm: _____ Date: _____

PERMIT TO PERFORM WORK AS STATED ON THIS APPLICATION IS HEREBY GRANTED.

_____ Date: _____

Paul P. Huelskamp, PE, PS County Engineer

* Please submit one (1) set of plans for proposed project with this Application.

TOWNSHIP TRUSTEES NOTIFICATION: Date: _____ Approval Disapproval

Comments: _____

*This application, when signed by the Miami County Engineer, shall serve as a permit as authorized by the Board of Miami County Commissioner's Resolution No. 25-01-07.

*This permit is also subject to the terms and conditions as listed on page two of this permit.

GENERAL PROVISIONS APPLICABLE TO PERMITS

You, as applicant and if permit is approved, must notify the Miami County Engineer's Office not less than 2 working days prior to beginning work covered under this permit.

All work to be completed shall be under the supervision and to the satisfaction of the County Engineer or his designated representative (hereinafter referred to as "the Engineer"). Any work found to be unacceptable to the Engineer shall be removed, or corrected, by you, the permit holder, at your sole expense. If such unacceptable conditions are not corrected by you, as permit holder, the Engineer may correct, or cause to be corrected, such unacceptable conditions and you, as permit holder, shall reimburse the Engineer for any and all expenses incurred.

Current Ohio Department of Transportation Construction and Material Specifications as well as Miami County's requirements shall apply to all work performed under this permit. In all matters pertaining to interpretation of specifications and disputes, the decision of the Engineer shall be final.

If, in the future, improvements or relocation of a County or Township road is deemed necessary, by the Engineer, it shall be the total, financial and otherwise, responsibility of you, the permit holder, to repair, move, or relocate any and all items or conditions caused by or relating to your work within the County right-of-way.

It shall be the responsibility of you, the permit holder, prior to the commencement of any work, to contact the owner(s) of any and all utilities and/or facilities within the project area, and coordinating your work with and around such utilities and facilities.

Maintenance of all facilities installed within the road right-of-way, under the provisions of this permit, shall be the perpetual responsibility of the applicant. The applicant his grantees, successors, and assignees shall assume all future maintenance responsibilities of facilities or utilities installed as well as conditions created or rising out of work performed.

Any changes in plans or installation procedures shall be submitted to the Engineer for review and approval prior to construction or continuing construction of the work under this permit.

You, the permit holder, shall notify all affected property owners at least 48 hours prior to the commencement of work.

TRAFFIC AND SAFETY

Traffic shall be maintained, unless permission is granted by the Engineer to close the road. Requests for road closings must be submitted 48 hours prior to the desired closing time, for approval by the Engineer.

At all times during the progress of work, adequate protections shall be provided by you, the permit holder, for the protection of the traveling public. Such protections shall include signs, barricades, lights and flagmen. All traffic controls shall be maintained in accordance with the Ohio Manual of Uniform Traffic Control Devices.

You, the permit holder, shall hold harmless, defend and indemnify the Board of Miami County Commissioners and the Miami County Engineer, its elected and appointed officials, all employees and volunteers, all boards, commissions and/or authorities and board members, including employees and volunteers thereof against all claims, suits, actions, costs, counsel fees, expenses, damages, judgments, or decrees, of every name and description, by reason of any person or persons or property being damaged or injured by you, the permit holder, or any of your assigns, or any person employed by you, or any subcontractors, or in any capacity during the progress or arising or growing out of the work, whether by negligence or otherwise.

Storage of any material, equipment, or other items within the road right-of-way is not permitted.

RESTORATION

All areas disturbed or damaged by operations shall be restored to their original condition and the satisfaction of the Engineer.

Any drainage tiles, culverts, or other utilities or facilities encountered during the course of work under this permit shall be replaced or repaired to the satisfaction of the utility or facility owner and the Engineer. Existing drainage, water, electrical, telecommunications and all other facilities shall be maintained during the course of the work. Any liability or problems arising out of the cutting, blocking, or interference with any of these items shall be the sole responsibility of you, the permit holder.

Upon completion of work associated with this permit, all rubbish, trash, and construction debris shall be removed and the roadway and right-of-way shall be restored to a condition that is acceptable to the County Engineer. This shall include, but is not limited to: Backfilling, grading, raking, seeding and mulching. You, the permit holder, shall be responsible for restoration of, in most cases, healthy, thick, growing grass in appropriate areas. Your responsibility does not end with seeding.

ROADSIDE EXCAVATION

Any excavations made within the limits of the highway for conduits, drains, or other underground structures shall be properly backfilled with approved material. All trenches and openings within 5 feet of the edge of the pavement must be backfilled with compacted, acceptable, granular material.

Buried cables shall be installed to a minimum of 30 inches.

Special provisions apply to the installation of Fiber Optic Cable. Contact the Engineer's Office for installation specifications

Backfilling and restoration shall follow completion of excavation, as closely as possible. At a minimum, each day's excavation shall be backfilled to the current excavation site and restored to an acceptable rough condition.

Roadside drainage shall be maintained at all times.

The pavement and berms must be kept clean of dirt, mud, and debris at all times. Excavated material shall not be piled or broadcast upon the road surface. Material is to be loaded onto trucks as excavated for removal or reuse.

Operation of construction equipment from or on the roadway shall be prohibited unless approved by the Engineer

You, the permit holder, shall be responsible for any pavement and/or berm damage and/or failure or trench settlement occurring within twelve months of completion of the project, if determined by the Engineer, to have resulted from your operations within the right-of-way.

OPEN CUT OF ROADWAYS

The pavement over open cut roadways shall be saw cut in a straight line parallel to, and 12 inches beyond, the edge of the trench. Any pavement or berm area less than four (4) feet in width shall also be removed and replaced in its entirety.

Preferred backfill for areas under the pavement shall be Controlled Density Fill (CDF) material. Alternate materials may include No 57 stone, ODOT Item 411, ODOT Item 617 or ODOT Item 304 (ODOT Item 703 Structural Backfill Type1, and Type 3) as approved by the Engineer. In the case of granular material, each course shall be compacted by the use of mechanical compactors or alternate methods as approved by the Engineer.

Pavement and base materials shall be replaced "in kind" to include the type and depth of existing material. At a minimum pavement repairs shall consist of 12 inches of ODOT Item 304, 2 inches of ODOT Item 448 Type II, and 2 inches of ODOT Item 448 Type I.

You, as the permit holder, shall maintain a suitable temporary driving surface of gravel or bituminous material until final pavement restoration is completed.

You, the permit holder, at your sole expense, shall restore damages to roadway areas outside of the trench limits.

You as permit, holder, shall be responsible for any deficiency occurring in the restored pavement for a period of not less than 12 months following final completion of the work under this permit.

HOLD HARMLESS

The applicant agrees to hold harmless, defend and indemnify Miami County, Ohio, its elected and appointed officials, all employees and volunteers, all boards, commissions and/or authorities and board members, including employees and volunteers thereof against all claims, suits, actions, costs, counsel fees, expenses, damages, judgments, or decrees, of every name and description, by reason of any person or persons or property being damaged or injured by Miami County or any of its subcontractors, or any person employed by Miami County, or under any of its subcontractors, or in any capacity during the progress or arising or growing out of facilities installed under this permit, or any similar permit, whether by negligence or otherwise.
